

DAISY CHALET

7GF2+M6
RUMURUTI
KENYA

Feel free to **explore the garden along the walking paths**. We are growing different crops depending on the season, please reach out if you are interested in learning more about what we do. **Daisy Chalet is a sustainable farm**, so we have water reservoirs, water tanks and solar panels.

1 DAISY CHALET

In the main building of Daisy Chalet, you are welcome to relax in one of the **living room**, get some work done in the **office space** and enjoy **farm-to-table lunches and dinners**. In the BBQ behind the house, we cook the **corn** that you can pick up in the garden.

2 GAZEBO

Our gazebo offers a common **covered outdoor space** with a beautiful view on the property. In the mornings, you can enjoy your **breakfast** here before starting your day.

3 ANIMALS

In the farm, we have **goats and chickens**. Sometimes the chicken runs free in the garden!

4 KITCHEN GARDEN

In this part of the garden, you can see where the **food you eat** is grown.

5 FOREST

The forest is home to many birds. Its second name is **'apartment blocks for birds'**, as they love to stay in the trees there. The forest is also where we maintain our bee colonies. You are welcome to suit up and **learn about beekeeping!**

6 SUNSET SPOT

At end of the property, you will find the best spot to observe the sunset on the horizon.
